

# Environment

# Policy

## **Commitment.**

MK Construction Services Pty Ltd strongly believes that performing works in a manner that brings no harm to the environment is important to achieving successful project outcomes. Therefore we are committed to protecting the environment and reducing the impact of construction on the natural and rural landscape.

## **Goals & Objectives.**

MK Construction Services Pty Ltd will, where appropriate:

Ensure that all relevant environment legislation and the company policy and Environment Management Plan are fully and effectively implemented, monitored, and complied with on a day to day basis.

## **Responsibilities.**

In doing so MK Construction Services Pty Ltd aims to:

- Protect all native flora and fauna
- Reduce construction waste and dispose of it accordingly in line with state/territory regulations
- Comply with advice from local authorities regarding cessation of hot work due to fire bans
- Identify erosion potential prior to commencing on site, and minimize ground disturbance and the clearing of natural vegetation where possible
- Ensure that drains, water courses and water bodies shall not become contaminated by rubbish, fuel spillage, sediment .
- Control or limit noise pollution in accordance to the statutory requirements applicable to the state/territory to which work is being carried out
- Respect areas of cultural significance and notify authorities if human remains, buried artefacts or other indications of an Aboriginal heritage site are discovered.
- Maintain, monitor, review, audit and continually improve their Environment Management System and associated documents as aligned to I ISO 14001 for Environmental Management Systems (EMS)

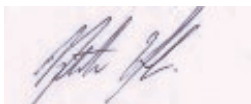

Employees (including subcontractors) will ensure that they:

- Follow the environmental policy and management plan as outlined
- Report all environmental incidents
- Comply with requirements associated with hydrocarbon and hazardous substance management

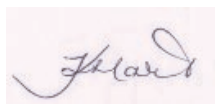

## **Consultation.**

MK Construction Services Pty Ltd shall communicate and consult the above policy requirements with all employees, subcontractors and visitors through the induction process.
